UK Building Program Jumps Ahead 2 Years

By ROYCE TAYLOR Kernel Staff Writer

The building program for moved ahead nearly two years by the additional allocation of nearly \$470,000 in state funds.

Announcement of the new allocation was made by Mr. Robert Matthews, state Commissioner of Finance, at a conference held Tuesday in the office of Dr. Frank D. Peterson, UK vice president for business administration. Mr. Robert Cornett, state director of budget, also was present at the conference

Receipt of these funds will per- King Library. mit the University to proceed im- A broken water pipe forced oc- The old law building will be conmediately with plans to finance cupants of the periodical room to verted to use as office space. the construction of four major evacuate shortly after 2:30 p.m. classroom buildings costing nearly \$6,000,000. These structures will round out a building program which began in 1960 and encompasses construction totalling about \$21,000,000.

The new building will replace or expand the facilities now used by the colleges of commerce, education, engineering, and law.

White Hall will be replaced by a building costing \$2,000,000 to be located between Memorial Hall

UK Librarian Dies Tuesday

Mrs. Algernon Dickson Thompson, 39, wife of University Librarian, Dr. Lawrence S. Thompson, died at her home Tuesday after a long illness.

Mrs. Thompson was the University's catalogue and art librarian, She was the author of a study of "The Western Review and Miscettaneous Magazines," and of the "Kentucky Novel."

A native of North Middletown, she attended Hollins College before graduating from the University. She received a graduate degree from Columbia University.

Services were conducted Thursday morning with burial in the North Middletown Cemetery.

be accepted for it within two or University expansion has been three months, Dr. Peterson said ing, and a new structure for the Tuesday.

Accuracy

Funny how an insignificant, little, seemingly unlistened to comment will come back to haunt a person. Funny how that person's comments carry a great deal of influence after he is

years in the University School of Journalism.

Ritter left the University for Texas A. & M. after the completion of the spring semester. However, it is a quiet, little insignificant comment of Ritter's which often comes back to haunt his students.

There they were, 18 students, on that October day, 1960, more interested in a liberal education than a strict schedule. Ritter, a native of Kansas and new member of the University staff, began to address the students who one day hoped to run the country's newspapers.

This business of words is a dangerous thing," the smooth talking, pipe smoking Ritter said.

"It is the inconspicious, little, unsuspecting words and facts which get you in trouble. You may spend a long time working on a story and end up with nothing, or work only a few minutes and have a good story. Just make sure, whatever you do, to remember that nothing tucky! beats accuracy

That bit about accuracy was seemingly lost in the classroom conversation. It was not forgotten, but slightly overlooked when a story was compiled about Elvis J. Stahr Jr., a few weeks ago.

Stahr recently became president of Indiana University when he took the position from retiring Herman B. Wells.

Stahr graduated from the University in 1936 and was a member

of the tennis team for the four years he was in school. The Hickman student set records of two types while a student. His first was in scholarship, the second in tennis.

As a scholar Stahr compiled a 4.0 standing while majoring in English, won a Rhodes scholarship, was elected to Phi Beta Kappa and Omicron Delta Kappa. While in school he also won the National Balfour Award for being the outstanding member of the Sigma Chi fraternity.

During the 1936 season Stahr helped H. H. Downing's Wildcats compile the best tennis record posted in the history of the University. The '36 Cats won 11 of 12 matches.

The 1961 Wildcats won 14 of 18 matches to better the '36 team's

win record, although the percentage was not as high. The report said Stahr did not play tennis during the 1933 season

(his freshman year). The report also said the '36 record stood, until broken by the 1961 team.

All information came from two sources, the University's sports publicity office and the 1936 Kentuckian. Records at Memorial Coliseum do not list the 1933 freshman tennis numeral winners, therefore it was assumed Stahr was not on the

Then comes a letter from Bloomington, Indiana, which brings back thoughts which Ritter tried to leave with his class on that October morning in 1960.

Below is the letter.

Dear Bill: Miss Helen King very thoughtfully sent me a copy of your column of June 29, which you devoted to a yery flattering article about me, and I just wanted you to know that I enjoyed and appreciated it.

Purely for the sake of keeping the University's sports records in good order, I thought you might not mind my drawing your attention to a couple of points in connection with the column. The first is minor and is merely that I did in fact play on the freshman tennis team in 1933. Somewhere in some old trunk, probably in Hickman, I still have the numeral sweater.

The other point is rather major in that it has to do with the 1936 record of the University of Kentucky tennis team. I believe you can get the exact data from my co-captain of that year, Mr. James A. Moore of Philadelphia, who keeps better records than I do, but the important point is that the 1936 team played something like 12 or 15 other college and university teams and lost only once, that being to Michigan State at the end of a rather strenuous road trip which included victories over Cincinnati, Indiana, Purdue, Notre Dame, and Wayne. As I remember, we didn't lose to any southern team that year. Moore and I were co-captains and played No. 1 doubles. He played No. 1 singles and I played No. 4

As you will appreciate, I am not bringing this up on my own behalf but rather because I think it would be a pity if the great record of the 1936 team were lost with the passing years.

Yearbooks are not always completely accurate but probably the 1937 Kentuckian would show the records of the 1936 Continued on Page 4

Professor Charges Texts Watered Down

A University history professor recently charged that certain pressure groups determine the context of much educational material.

Dr. Bennett Wall said, "Many times these groups are successful in having vital information deleted from school textbooks.

Addressing a College of Education Textbook Conference, Dr. Wall said publishers are pressured by various groups to omit material which the groups find objectionable on racial, religious and political grounds.

As a result, he continued, textbooks too often are watered down interests and needs. to suit the demands made by the various pressure groups.

ice" on grounds that the character tool.

Shylock was an unfair reflection upon the Jewish people.

Another faculty member, Dr. Alfred Crabb, assistant professor of English, contended textbooks too often are selected by administrators who have little or no contact with the classroom.

Dr. Crabb listed several aids to help teachers in selecting textbooks. First, he said, the teacher should ask himself how thoroughly the text recognizes the pupil's

Buildings Under Construction

Although four buildings in the University expansion program are still in the planning stage many are under construction and will soon be ready for occupancy. Pictured above are three such buildings. On the far left, the back side of the new library addition is pictured. The new facilities will allow for the first time the stacks to be open to both students and faculty. The addition to the Student Union Building is pictured

in the center. This addition will replace the old Faculty Club, located beside the Law School, and expand cafeteria facilities. The last picture shows the Chemistry Physics Building, scheduled to open January, 1963, and "Dr. Dickey's Silo," (the device for testing atomic materials). The buildings will greatly aid in eliminating crowded classroom conditions.

UK Building Program Nears Half-Way Mark

for expansion of colleges and be converted to office use. universities is partially fulfilled by UK through a multi-million dollar building program which is nearing the half-way mark to completion.

New classroom facilities nearing completion or planned and office space made avanasie unough icnovation of older buildings will relieve the crowded conditions imposed by the University's current enrollment, Dr. Frank D. Peterson, vice president for Business ing. Administration, said.

Dr. Peterson estimated that continuation of the construction program now in progress could lead to an increase of 5,000 in en- materials will be used. rollment by 1970.

Dr. Peterson said the most immediate benefit derived from the new buildings will be an increase in the morale of the faculty and the creation of an environment for the student which is more conducive to learning.

cilities at the University has been recognized by both the University and state administrations for some time. The current program for new construction totaling nearly \$21,000,000 has been under consideration for at least six years.

The state's concern for the University's drive for progress was illustrated by Mr. Robert Matthews, Commissioner of Finance. He said the \$467,000 in additional funds recently granted the University were made available from money allocated to the Capitol building fund.

Dr. Peterson cited completion of the chemistry and physics building which is scheduled for use in January, 1963, as an example of the tucky farmer and in so doing easing of crowded conditions existing today. Additional classrooms This building also will replace purpose of raising the economic

Continued from Page 2

spring sports teams. So far as I know the 1936 team has the best record in tennis which UK has ever had.

Sincerely, Elvis J. Stahr, Jr.

P.S. Incidentally, the score of the loss to Michigan State was 5-4, and two of the five matches which we lost that day went the full three sets and were nip and tuck to the last point."

The record of the 1933 UK Kitten tennis team was three wins against one loss. Wins were recorded over University High (6-1), Winchester (7-0), and Henry Clay (7-0). The only loss suffered by the Kittens that spring was a 2-5 loss to Berea Academy

The 1936 varsity tennis team took 11 of 12 matches. No other Kentucky team has been able to match this record for a 12 match schedule, but the 1961 team established a new mark for the number of wins in one season. The 1961 team won 14 of 18 matches.

The percentage is in favor of the '36 team-.916 to .777. A person would ordinarily think a university president in office little more than a week would have more to do than worry about the 1936 tennis record of the University of Kentucky.

Not so at all. If a person of that caliber has time to devote a few moments to the Kernel, the least a reporter can do is be accurate.

This brings back another Ritter comment. "It doesn't matter how minor a detail it happens to be, it is important to somebody."

War Papers

The news of the first and second World Wars and the dropping of the atom bomb on Japan can be seen in the screaming headlines of the day in a display in the journalism building. The newspaper display also shows a series of historic events including the assasination of Lincoln, the sinking of the battleship Maine, the Titanic, and the Lusitania.

The display is located in the south end of the corridor on the
